

# GUARDIAN VOICELINK™

...additional convenience and peace of mind

**Add another layer of protection to your security system with direct voice communication tied to Guardian's 24-hour central monitoring station.**

## •Direct voice contact with Guardian's Central Station

During an alarm activation or an emergency, speak directly to a Central Station operator through a keypad intercom from anywhere in the room. There is no need to pick up the phone or dial a number.

## •Monitor activity in another room

By placing a unit in another room such as a nursery, you can monitor activity or use it as an intercom throughout your home.

## •Check on loved ones

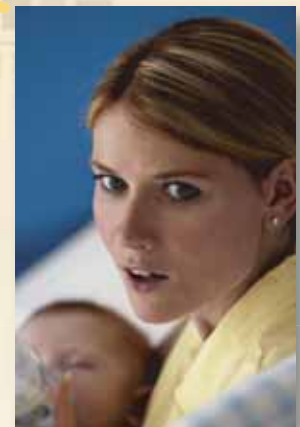

By dialing the home phone and entering a code, you can use Guardian VOICELINK™ to check on family members who fail to answer the phone or who might be unable to answer the phone.

### HOW IT WORKS

The central station operator dispatches the proper authorities to your home if necessary.

During an emergency press any emergency button on your keypad and speak into the Guardian VOICELINK™ unit. (If an intrusion occurs and your alarm sounds, your Guardian VOICELINK™ unit will automatically activate.)

An operator in Guardian's U.L. Five Diamond certified 24-hour central monitoring station receives the signal and speaks to you through the Guardian VOICELINK™ unit.
